

## Camp Summit Team Equipment List

Team leaders should ensure the following supplies are purchased and taken to Camp Summit for use on the project. These are expensive and, at times, scarce supplies in Costa Rica. Thank you for your help.

- ❑ (2) Levels-the longer the better
- ❑ Welding supplies: (2) 10 lb. rolls of 0.035 flux core welding wire, (10) 0.316 tips, (1) replacement line.
- ❑ (3) rolls of duck tape.
- ❑ (3) rolls of electrical tape.
- ❑ Have a few team members bring their cordless drills with a set of bits and other accessories for wood, steel and concrete.
- ❑ (5) lines for block laying, unless the project does not include block laying.
- ❑ First aid kit—the team leader should assign two qualified team members as the health and safety supervisors. (If you must purchase a new kit, we recommend the Adventure Medical Comprehensive First Aid Kit which can be purchased by visiting <http://www.backcountrystore.com/store>.)
- ❑ Check with John Anthony, the Camp Summit Construction Supervisor ([john.anthony@agmd.org](mailto:john.anthony@agmd.org)) to see if your project will require other supplies, or different quantities.
